

Non-Motorized Transportation Bike & Pedestrian Facilities: Into the Future

A photograph of a gravel path leading to a paved road in a forest. The path is made of grey gravel and runs from the bottom center towards the horizon. To the left of the path is a grassy shoulder, and to the right is a dense line of green bushes. In the background, a paved road with a white line runs parallel to the path, leading into a dense forest of tall evergreen trees. In the far distance, a mountain range is visible under a clear sky.

Why Fund Non-Motorized?

SAFETY!

HEALTH

POLLUTION REDUCTION

Advocates of Non-Motorized Facilities

Here's just a few...

- AARP
- Alliance for Biking & Walking
- American Academy of Pediatrics

Sitka: Cross Trail Construction

Coffman Cove: Wander Around Town Trail

Juneau: Auke Lake Trail & Wayside

Ketchikan: Water Street Sidewalk Improvements

**IMPROVEMENT PROJECTS:
ACCOMMODATING ALL USERS**

A black bear is walking across a wooden deck or platform in a forest. The bear is black with a lighter patch on its chest. It is walking from left to right. The deck is made of light-colored wood. In the background, there are many green trees and a large tree trunk with some white markings. The text "FINDING BALANCE" is overlaid at the top in large, bold, black letters.

FINDING BALANCE

AS WE MOVE FORWARD
